Auto-vacuum is simple, easy and fast.

Auto-vacuum process

Place your pouches and close the lid. The Hi-Tech's A220/A226 auto unit will perform a complete automated vacuum process all by itself letting you concentrate on your products instead of its package. With the auto-vacuum process you will be ensured that you get constant results no matter the size or the quantity of products your are vacuum packaging.

Autoclean

At the end of the day, just press the autoclean button and close the lid. The unit will perform self-maintenance operations and will also let the pump run for 10 minutes to eliminate undesirable excess of water vapor. The autoclean will help you keep your unit and pump at their optimize performance and extend their life.

Newest pressure sensor and latest technology

With the latest digital signal processing techniques and latest advanced micromachines hardwares and pressure sensor technology, you are ensured to have accurate vacuum control and/or gas pressure control. Combined with the automated vacuum process, you will be able to package a wide variety of products fast and easy.

Busch pump

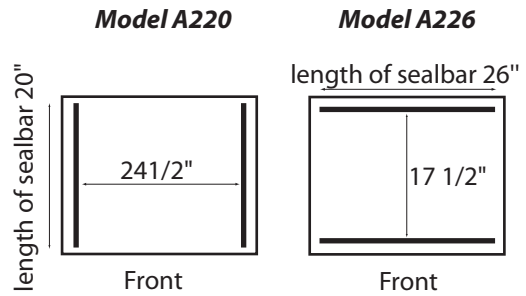

Every Hi-Tech Vacuum's equipment are built with Busch pump. The model A220/A226 Auto is equipped with a 40, 63 or 100m³/h Busch pump designed for North America.

Specifications

 **HI-TECH VACUUM**

Busch pump:	40, 63 or 100m3/h
Vacuum level:	99.9% (2 mbars)
Voltage:	208/575VAC
Phases:	3 phases, 60 Hz

Designed features

- Auto-vacuum process ensures that you get constant results no matter the size or the quantity of products you are vacuum packaging.
- High efficient and robust reliable Busch pump.
- Package easily with the convenience of two (2) seal bars.
- Chamber is designed roomy to fit large cuts.
- Suit most pouches of North American size
- Uniform and weld-sealing (tear resistant) with two (2) V-shape Ni-Cr wires RoSH compliant on each seal bar.
- Pressure sensor and micro-processor technology : accurate and reliable operations.
- Adjustable shims with easy set-up supports help you dispose and manipulate pouches fast and easy.
- Wide open dome lid facilitates fast loading and unloading of pouches.
- Unobstructed visual control of packaging process with whole see-through lid.

Digital controls features

- Full automated vacuum packaging process.
- Vacuum AUTO mode (FULL vacuum + optimization).
- Vacuum PARTIAL mode (0 to 95% of vacuum).
- Auto-cleaning process.
- Quick Seal and Quick Stop.
- Memorizing up to 25 different programmable settings.

Auto-cleaning process helps you keep your unit and pump at their optimized performance and extend their life.

Vacuum AUTO mode performs a full vacuum packaging process entirely by itself letting you more time working and concentrate on other important tasks.

Vacuum PARTIAL mode provides you total control on the result of your package.
